

INSTALLATION INTERIOR

AVAILABLE DIMENSIONS

WIDTH

152 cm

LENGTHS (ROLLS)

30 m

DESCRIPTION

DOS 060 is a 75 µm safety film applied to the back of mirrors. On breakage, it holds fragments and prevents glass shards from falling. 98% UV blocked.

DURABILITY

Up to 20 years.

MAINTENANCE

30 days after installation.

STORAGE

5 years away from moisture.

APPLICATION METHOD

The surface to be bonded must be free of dust, grease, or any other contaminant. Some materials like polycarbonate can cause bubbling. A compatibility test is therefore recommended.

GLAZING COMPATIBILITY

SINGLE

TEMPERED

DOUBLE <1.20M

DOUBLE >1.20M

LAMINATED

GLAZING COMPLIANCE

Glazing exposed to the sun must be of good quality and installed in compliance with glazing standards to guarantee the performance and durability of the film.

IMPORTANT NOTE

To ensure perfect uniformity across a project, it is recommended to exclusively use films from the same production batch and not mix different widths. Slight variations in tint or appearance may occur from one batch to another or depending on the widths, which could lead to visible differences once the strips are installed side by side.
